

New from Central Association of Bee-Keepers Publications:-

Aspects of sociality in insects.

Compiled by Norman L. Carreck and Tony W. Johnson.

Published October 19th 2007.

ISBN: 1-904379-14-1

A5, 203 pp. softback.

This book is the third in a series of collected lectures presented by leading scientists to the Central Association of Bee-Keepers. The 19 papers cover many aspects of social behaviour in the Hymenoptera and Isoptera, including: evolution; communication; organisation; feeding; reproduction; their interactions with man; and their conservation. The book will prove to be valuable to students, beekeepers, and all those with an interest in natural history.

Price: £9.95 (£7.95 to members of the Central Association of Bee-Keepers)
+ £1 postage and packing.

Bona fide journalists and editors may apply for a free review copy.

Available from: Central Association of Bee-Keepers Publications, 25, Tyrone Road, Thorpe Bay, Essex, SS1 3HE. Email: zyzythomas@aol.com
